Universa, Base plate for Benches, anthracite-concrete

Product code: OP.BB.AB

Why a base plate? A base plate provides strength and stability to the bench or football table that is placed on it. Thanks to the diamond profile on the top, slipperiness is prevented in damp weather. Liquid drains into the gutters and the concrete prevents unwanted growth of weeds and the like around the bench. This base plate with dimensions of 246 x 120 x 10 cm is specially made for supporting a HeBlad concrete bench. Because this plate is made of thoroughly coloured anthracite concrete, it fits perfectly with the anthracite oval concrete bench or DeLuxe anthracite concrete bench.

How is the base plate placed?

Due to the weight of 525 kg and the large dimensions, this base plate is delivered with a truck with loading and unloading crane. The reach of the crane is five meters, which means that the installation must be done within five meters of the truck. So always adviseour delivery conditions in advance.

The base plate can be placed at cutting height. This makes it easy to keep the area around the plaque tidy. You can mow the lawn without having to cut and sweep without annoying edges.

Which base plate fits best?

At HeBlad we love customization and suitable solutions. That is why we have developed various base plates that match our gaming tables exactly. The base plates for our ping pong tables and picnic sets are also available separately. You can also choose from the colour natural concrete or anthracite concrete. Completely tailored to the product that will be placed on the base plate.

£ 1,650.00 excl. VAT (£ 1,980.00 incl. VAT)
