Bench Standard Natural Concrete

Product code: BB.ST

£ 1,650.00 excl. VAT
(£ 1,980.00 incl. VAT)

Our concrete bench is made of a single piece of concrete and weighs 800 kilos. It is an ideal bench for your garden or at your company, because it gives people a place to sit, rest, have something to eat and drink and have a chat. But because it is, in simple terms, a block of concrete, it can also serve as a boundary fence. We even have customers who have placed our concrete benches around their facility to prevent a ram raid. This way they get peace of mind and offer t heir customers and bystanders a place to sit. That's two birds with one stone.

Various applications of concrete bench

Our concrete benches can be placed in all kinds of places. Of course you can place it in your garden and combine it with our ping pong table or football table. You can also do this if you have a terrace or if you want to give visitors to your establishment the option of sitting outside. Other ideal places for these concrete benches are in the park, on the schoolyard or on the market. Because they are made in one piece, they cannot be taken apart and because they weigh 600 kilos, they are not exactly easy to steal. Once you have installed this concrete bench, you can be sure that you and everyone who visits you will enjoy using it for many years to come.

Concrete bench features

Our concrete benches have a simple design and can be supplied with or without a base plate. Because they are made of high-quality C45/55 concrete with a high compressive strength, they are almost indestructible. The dimensions of the seat are 175 by 30 centimeters, which means that you can easily seat four people.

17 November 2026 - Prices subject to change

Our products are delivered from our factory in the Netherlands.
