Checkers/Drafts Bench, Anthracite-Concrete

Product code: BB.CK.AB

£ 2,425.00 excl. VAT
(£ 2,910.00 incl. VAT)

The game of checkers has never been so beautiful. This beautiful anthracite concrete checkers bench is made from one piece of concrete and the table top is inlaid with a checkers game. Two people can sit on either side of the checkers game and compete with each other there. The checker bank owes its robust character to its shape, but also to its colour. The concrete is entirely anthracite coloured, so if the bench unexpectedly suffers any damage, it will hardly be noticeable. Fortunately, the solid concrete is of such hardness that not many things influence the material. Vandalism and weather influences are not a factor for the anthracite concrete sheet pile.

The safety and sturdiness of the checker bank

Because the checker bank consists of one piece of concrete, this bank can very well be used multifunctionally on your site. In addition to its function as a game table or rest area, the bench can be used perfectly to protect your building. If you place the checker bank in front of a vulnerable part of your building, it makes a very good protection against ram raids for example. The placement also has a deterring effect.

Variations on the anthracite concrete checker bank

This robust anthracite concrete checker bank is available in different designs, but with the same base. The natural concrete checkers bench has a light appearance and, like its sibling, has an integrated checkers game in the table area. The bench can also be ordered as an anthracite concrete chess bench and natural concrete chess bench. The game of checkers has made way for a game of chess in these

tables.

Stability for the HeBlad banks

The fact that HeBlad products are specially designed and produced for years of outdoor use entails that they are strong and heavy. Not every surface is suitable for housing such weight. We have made a base plate for all HeBlad benches and banks for this purpose. For example, the anthracite concrete bench base fits perfectly with this anthracite concrete checker bench, the same colour and the same material. Please contact us if you have any questions about whether or not to use a base plate.
