A light-coloured, aesthetically pleasing, slim and functional game table for the outdoors. With the right seat and table top height, it is a great place to sit. The backgammon board game is integrated into the table top itself. The table and seats are made of concrete and the game board is made of natural stone, specifically designed and made for outdoor use.

What is backgammon?

In the board game backgammon, players have to move stones across the board from one side to the other. The points are determined using a die. The opponent walks across the board in the opposite direction. Along the way the other person's stones can be struck. The goal is to be the first to bring 15 stones to the other side of the board.
