The board game backgammon is one of the oldest games in history and has been around for thousands of years. It is said to have originated in Mesopotamia, modern-day Iraq and Iran. The game has evolved over time, but can be traced back far back in history: approximately 5,000 years. The ancient Greeks and Egyptians were depicted playing backgammon. And the game was also very popular during the Renaissance in France.

Concrete backgammon table for 4 people

HeBlad's game tables, benches and picnic sets are designed and produced in our own factory and are made of one piece of concrete. This concrete is intended to serve outdoor locations for many years. The backgammon table has a slim appearance due to the standalones stools, but is incredibly sturdy due to its massive weight.

Where can you place the backgammon table?

This is possible in any outdoor area. The tables can be found in parks, private gardens, campsites, parking lots and schoolyards. Because the table is also perfectly suitable for sitting in addition to playing a game, it is an asset to any site. The 4 seats offer space for up to 4 people to sit and use the game board as intended, or as a regular table.
